

RACE TO THE MOON

MULTIPLICATION TO 5 X 5

Race to the Moon is a fun series of games which involve trying to make a path of unbroken counters from the Earth to the Moon. As well as developing quick recall of number facts, this game also involves strategy in blocking your partner whilst making your path.

Age range: 2nd Grade +

Number of players: 2 or 3

Learning: Multiply with numbers to 5x5, strategy

You will need

- 20 counters in different colors (one color per player)

Instructions

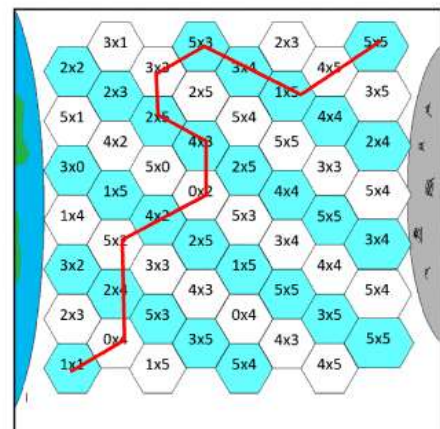

- Choose a multiplication you want to work out on one of the uncovered hexagons on the game board.
- Work out the answer in your head. You can use the multiplication strips line to help you.
- Say the calculation and the answer.
- Your partner will check in their head (or using the multiplication strips).
- If you are right, you place a counter on the hexagon. Then it is your partner's turn. If you are wrong, you don't get to place a counter.
- The winner is the first person to complete an unbroken path of counters from the Earth to the Moon (path can go across, down, diagonally). See below.

Variations

- If you get an answer wrong, your partner can remove one of your counters from the board.
