Mrs Howlett's Maths Challenge 11th May 2020

This week's challenge is all about rounding numbers to the nearest 5. You will also be practising your times tables.

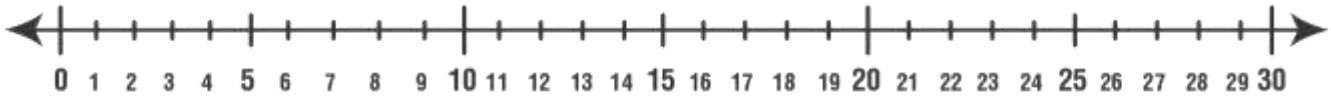
You will need two dice, a sheet of paper and a pencil.

1) Roll two dice to get two numbers between 1 and 6
2) Multiply the numbers together to find an answer
3) Round your answer to the nearest 5. This means your answer could go up or down.
4) Record your answers in a table…..you could draw a table in your book like the one below:

e.g. The numbers on my two dice are 3 and 6

3 x 6 = 18

I would then round 18 up to 20 (because 18 is nearer to 20 than it is to 15 on a number line)



Dice Roll 1	Dice Roll 2	Multiply together	Round to nearest 5
3	6	18	20
6	2	12	10
